## Summary

Manmeoksul is a general food product made with 100% broccoli sprouts. It is a groundbreaking product developed to allow easy consumption of globally researched sulforaphane ingredient in a natural food form. It is a representative product of Wellbeing200, which has been optimized and commercialized to be classified as other vegetables for easy import and sale overseas. Through continuous smart farm-based standardization research and development, consistent quality and stable supply are possible, and this product can create new sales opportunities as a next-generation premium health food product, especially in a global society accelerating the super-aging process after COVID-19.

Wellbeing200 Co., Ltd. is a green bio company specializing in global dementia prevention. Starting with its flagship product, Manmeoksul, the company is continuously researching and developing a lineup of green bio natural foods that systematically address major causes of dementia (diabetes, sleep, obesity, etc.).
